

# 300L SERIES

## KEY BENEFITS

- All-stainless wetted connection for corrosive or demanding service.
- Liquid-filled design improves readability under vibration and pulsation.
- Field-ready construction for reliable industrial pressure monitoring.

## STAINLESS X STAINLESS LIQUID FILLED PRESSURE GAUGE

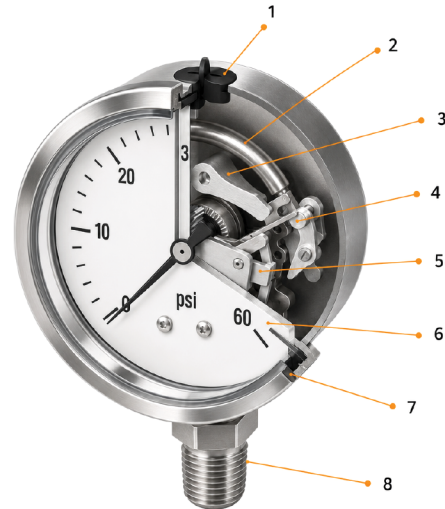

### OVERVIEW

The Apache 300L Series is a stainless x stainless liquid-filled pressure gauge designed for reliable, readable performance in demanding industrial pressure applications where corrosion resistance, vibration, and durability matter.

|            |                 |
|------------|-----------------|
| Housing    | Stainless steel |
| Connector  | Stainless steel |
| Face Sizes | 2.5" / 4"       |
| Connection | 1/4" & 1/2" NPT |

### MATERIALS / CONSTRUCTION

| # | COMPONENT    | MATERIAL                |
|---|--------------|-------------------------|
| 1 | Housing      | Stainless Steel         |
| 2 | Bourdon Tube | Stainless Steel         |
| 3 | Pointer      | Black Finished Aluminum |
| 4 | Movement     | SS304                   |
| 5 | Dial Face    | Aluminum                |
| 6 | Lens         | Glass                   |
| 7 | Ring         | Stainless Steel         |
| 8 | Connector    | Stainless Steel         |

### SPECIFICATIONS

|            |                     |
|------------|---------------------|
| Series     | 300L                |
| Type       | Liquid Filled Gauge |
| Housing    | Stainless Steel     |
| Connector  | Stainless Steel     |
| Connection | 1/4" & 1/2" NPT     |

### OPTIONS

- ☐ 2.5" face configuration
- ☐ 4" face configuration
- ☐ Bottom mount NPT connection

### NOTES

Design and material specifications may change without prior notice. Consult your Apache sales representative for current application, range, and availability information.

## QUALITY. INTEGRITY. RELIABILITY.

Engineered solutions for demanding environments.
